DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 2-2-05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Pat 6,744,046 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

1. Claims 57-66 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record fails teach or fairly suggest the claimed invention.

2. Specifically, no teaching or obvious suggestion was found of the limitation " focusing light from a source of light to intersect one or more of the liquid cone, jet and plume of the fluid emitted by the electrospray nozzle, detecting scattered light patterns, transmitted light patterns or both, passing through, reflected by or emitted from the fluid emitted by the electrospray nozzle as a result of the intersection of the light with the one or more of the liquid cone, jet and plume, with one or more photodetectors... comparing the interpreted patterns to a reference pattern, which is defined

by the predetermined electrospray pattern, with a second computer or microprocessor, and generating a control signal in response to the comparison and transmitting the control signal to a controller, which, in accordance with the control signal, and displaces the nozzle or the counterelectrode, or both, to adjust the distance between the electrospray nozzle and the counterelectrode...." as in claim 57.

3. Claims 58-66 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat No 6,245,227 issued to Moon et al is considered the closest relevant. ^{prior art} Moon et al disclose a feedback control (see col.14, lines 53-67), but fail to teach or obviously suggest the claimed invention.
